EDUCATION

B.Tech in Computer Science and Engineering | *Maharaja Agrasen Institute of Technology, Delhi* Dec, 2021 - Jun, 2025

- GPA: 8.57/10.0

WORK EXPERIENCE

Freelance Developer, *Curious Bunny Studios* Feb, 2026 - Present

- Delivered 3+ end-to-end full-stack applications, managing the complete development lifecycle from initial architecture to final deployment using Next.js, Node.js, and Bitbucket.
- Shipped cross-platform mobile solutions and scalable web interfaces using React Native, Expo, and TypeScript to meet diverse client requirements.

Fullstack Developer, *Systemsway* Sept, 2025 - Jan, 2026

- Built a responsive UI and node-based visual workspace using Next.js, React Flow, TypeScript, and Tailwind CSS, featuring a Kanban board and Zustand-powered autosave.
- Implemented backend services in Go with GORM and designed a PostgreSQL schema to support core application logic.

Freelance Developer, *Boozeburg* Apr, 2025 - Sept, 2025

- Developed a cross-platform mobile app using React Native, TypeScript, Expo, and Firebase, implementing social connections, recipe sharing, and custom drink creation workflows.

Fullstack Developer Intern, *Eazytaxes* Feb, 2025 - Apr, 2025

- Engineered a dynamic form-generation engine with 10+ custom React components using Next.js and Zod validation, while automating deployments to Digital Ocean via CI/CD and improving UI responsiveness using Tailwind CSS.

Software Developer Intern, *Destino Solutions* Oct, 2024 - Feb, 2025

- Optimized Next.js frontend performance and containerized backend services on GCP and AWS EC2 while mentoring 3 junior developers through code reviews and Git best practices to improve team productivity.

Fullstack Developer Intern, *Curious Bunny Studios* Jul, 2024 - Dec, 2025

- Designed full-stack MERN and TypeScript applications, reducing development time by 30% via Jira sprint planning.
- Managed the Agile lifecycle using Jira, Miro, and Bitbucket while achieving 95% code coverage with Jest and Cypress.

PROJECTS

Creati AI | Next.js, Node.js, TypeScript, PostgreSQL, Redis, Neo4j, Stripe, Docker, nginx, Digital Ocean, CI/CD | [Link](#)

- Designed an AI-powered platform to generate and customize high-level system designs based on user-specific architecture needs.
- Reduced latency and optimized data caching by integrating a CDN and Redis, ensuring high-speed asset recovery.
- Secured the production environment on Digital Ocean by configuring Cloud Firewalls and rate-limiting to mitigate brute-force attacks and protect user data and Stripe payments.

Cosmo | React Native, TypeScript, Solana SDK, RPC, Expo, CSS | [Link](#)

- Developed a Web3 mobile application enabling users to create or import Solana wallets and manage their crypto assets directly on-device.
- Integrated the Solana SDK and RPC nodes to facilitate asset transfers and token swapping, implementing local encryption for secure private key storage.

Versaile | Next.js, TypeScript WebSockets, Quill.js, MongoDB, Node.js, Digital Ocean, CI/CD, nginx | [Link](#)

- Built a collaborative text editor with AI features that allows multiple users to edit the same document at the same time.
- Handled real-time updates using Node.js and WebSockets, and reduced deployment time from ~15 minutes to under 3 minutes by setting up a CI/CD pipeline to Digital Ocean.

SKILLS

- **Languages:** TypeScript, JavaScript, Go, Python, SQL
- **Frameworks & Libraries:** React, Next.js, React Native, Node.js, FastAPI, Prisma, Tailwind CSS
- **Databases & Infrastructure:** PostgreSQL, MongoDB, Redis, Neo4j, AWS, GCP, Docker, CI/CD, Solana SDK
